

# TECHNICIAN INSTRUCTIONS COMPLIANCE SHEET

TANKS A LOT® watering machines are different. Ergonomically correct, TANKS A LOT® is made to be titled and rolled to carry the water's weight over the axle. It works very well when used correctly. READ THE PROVIDED INSTRUCTIONS. TANKS A LOTs® require very little maintenance.

- Ensure the band is tight.
- Ensure the caster nuts are tight.
- Ensure the four base flanges are secured under the tank exhaust outlet.
  
- DO NOT DROP TANKS A LOTs® FROM A VEHICLE.
- DO NOT ROLL TANKS A LOT® OFF CURBS OR STAIRS AT AN ANGLE.
- DO NOT LEAVE UNATTENDED.
- DO NOT FILL WITH WATER OVER 120° FAHRENHEIT.

By following these instructions TANKS A LOT® will provide many years of service and will not be stolen. If you do not follow these instructions, you may be charged the cost of repairing or replacing the TANKS A LOT® watering machine.

The TANKS A LOT® machines will be examined by management for compliance with requirements stated above. The Equipment Condition Report is provided for recording wear and tear that occurs over time. Only abuse causes damage. General wear and tear repairs will be budgeted and scheduled as necessary.

I hereby agree to these terms. Failure to perform the above maintenance may result in repair/replacement costs being deducted from my wages/salary, and may result in termination.
